Re: Castle Construction – Letter of Recommendation

To Whom It May Concern:

TAM+CZ, LLP, Architects recently had the opportunity to work with Castle Construction on one of our many projects for Central Unified School District; specifically McKinley Elementary School, and found both Jon Hunter and Jerry Beavers to be a most competent and delightful project superintendents, along with the subs that work with him and for them.

Castle has proven to be eager to please both the owner and the architect; they are very cooperative, responsive to the architect and owner's needs, honest with their bid prices, fair with their subs, and many times went way beyond the normal call of duty, noting items that could be changed with little or no extra cost.

Their project was completed on time, within budget, and without any unneeded delays. Material and subs were scheduled correctly, they responded promptly and delivered on due dates.

Being said, we at TAM+CZ Architect highly recommend Castle Construction and their employees to anyone or organization that is anticipating any construction work.

Please feel free to call me if you wish to discuss in depth the work that they did on the McKinley Elementary School project.

Sincerely,

TAM+CZ, LLP, ARCHITECTS

William H. Moynihan, Architect
