To whom it may concern:

**Subject: Castle Construction
Letter of Recommendation**

Ladies/Gentlemen:

The purpose of this letter is to describe our recent experience working with Castle Construction, specifically Reno Coletti, Principal and Ron LeBoeuf, Project Superintendent, on the Mountain Vista High School Relocatables project for Madera Unified School District.

Taylor Teter Partnership provided architectural and engineering services to the District for the subject project. The construction phase of the project was started in early June, and is on schedule to complete in the next few weeks. Over the course of the construction, as is typical for summertime modernization and relocatable classroom projects for school districts, there were issues that had to be resolved quickly, and collaboratively, to keep the work moving so that it could be completed within the very tight time frames for summertime school construction. The specific project was even more complicated by the fact that the property is owned by the City of Madera, and leased to the District, and there was another modernization project going on simultaneously in existing adjacent classroom buildings by another contractor, creating multiple additional entities with which coordination was required.

Throughout the entire project, we found both Reno and Ron to be most pleasant to work with, they managed their subcontractors well from our view, and were very collaborative and patient in working out issues and dealing with changes as they arose without the very common adversarial attitude that often accompanies contracts awarded on a competitive bid basis. In summary, we are very pleased to recommend Castle Construction to any who would have a chance to work with them, and hope to see them on future projects designed by Taylor Teter Partnership.

Sincerely,
Taylor Teter Partnership

Jim Sutton
